

SUMMIT OF THE SOUTHEAST 2016

Introduction to IQuity

Drew Harmata, PhD
Director of Operations, IQuity, Inc.

The Technology

A revolutionary suite of algorithms powering tests that can support physicians in reaching a speedy diagnosis for patients with autoimmune disease

How it Works:

- Analyzes the **RNA expression** found in a blood sample
- **Matches** each RNA expression profile against both healthy and sick patient profiles **with accuracy > 90%**

The Tests

Isolate^{MS}

Tools for providers to accurately diagnose autoimmune disease sooner so patients get answers and treatment earlier than currently available

First Test: IsolateMS

- Clinically validated and will be **performed by Diatherix Laboratories**, a CAP-accredited, molecular diagnostics laboratory
- Assists providers in **identifying suspected MS at the earliest onset of symptoms**
- **> 90% accuracy in as little as 7 days.**
